HOMEWORK PROJECT 1

INTRODUCTION: Practice the concepts that you have learnt in Class 1 (HTML Basics) and Class 2 (CSS Basics). Implement those concepts to get the output as given in the above image. It will be a one page site for now.

SPECIFIC TASKS TO COMPLETE:

1. Apply an image as a logo and heading tags as your name on the top of the page.
2. After that, create a menu list after having some spacing. Linking pages to the menu is optional.
3. Divide the page into 2 sections- 'About me' and 'random facts about me'.
4. 'About Me' section should have a heading and a paragraph.
5. 'random facts about me' should include 1 picture of yourself and some random or funny facts about you.
6. At last, you need to give a copyright line with your name and current year.

HINTS:

- The body of the page can have a css border box with gradient color filled in it. You can use either div tags or table tags for giving partitions.
- When you apply text after image, it might be in the next line. To align it vertically with the image, you can use attribute align="left" inside OR style="float: left; padding: 0px 50px".

OTHER OPTIONS:

ALIGN OPTIONS	STYLE OPTIONS
<ul style="list-style-type: none">• align="left"align="right"align="top"align="middle"align="bottom"align="baseline"align="texttop"align="absmiddle"align="absbottom"	<ul style="list-style-type: none">• 4 numbers in padding represents top, right, bottom, left values.• Float option can be- left or right.
